

QR Studio quick start

QR codes for any link · qr.stroban.app

A QR code that scans, in five steps

Paste a link, or fill in a WhatsApp number, phone, email or UPI ID, and QR Studio draws the code as you type. Everything happens in your browser: the links in your codes are never sent anywhere, and you don't need an account.

Free

₹0

- Unlimited codes for any link or text, every error-correction level, your colours with a contrast check
- 600 px PNG download and copy, with a small qr.stroban.app watermark in the corner

Pro

₹199 · pay once (\$12 outside India)

- No watermark, PNG up to 2000 px, SVG and PDF
- Your logo in the centre, designs, a frame with a caption, and batches of codes in one ZIP

CONTENTS

1. Make a code
 2. Check it will scan
 3. Download or copy
 4. The Pro extras **Pro**
 5. Activate Pro **Pro**
- Good to know and help

1 Make a code

1. Open qr.stroban.app and tap **Make a code**, or scroll down to the maker.
2. Under **Make a...**, choose what the code should do: **Link**, **WhatsApp**, **Call**, **Email** or **UPI pay**.
3. For a link, paste it in the **Link** box. Plain text works too. For the others, fill in the boxes that appear, such as the number, or the UPI ID, name and amount.

The code appears on the right (below, on a phone) and changes as you type.

Make a...

Link WhatsApp Call Email UPI pay

Link

<https://www.example.com/menu>

Any text works too — plain text, Wi-Fi details, or a phone number.

A code for a link.

Link WhatsApp Call Email **UPI pay**

sampleshop@upi

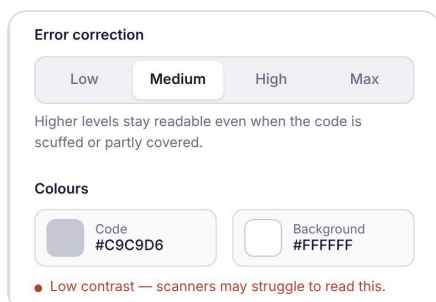

Sample Store

250

A UPI payment code (sample details).

2 Check it will scan

- **Error correction: Medium** suits most uses. Choose **High** or **Max** for a code that may get scuffed or partly covered, such as on a table or a box.
- **Colours:** tap **Code** or **Background** to pick your own. Keep the code dark on a light background.
- If the colours are too close, a red note says "Low contrast — scanners may struggle to read this." Make the code darker or the background lighter until it goes away.

A pale code colour gets a warning.

Before you print a batch, scan the code once with your phone's camera.

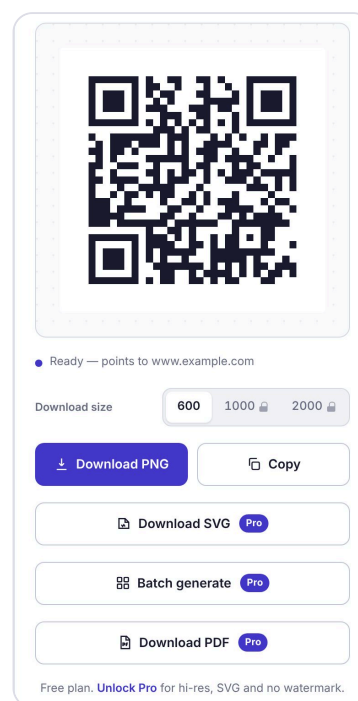

3 Download or copy

- **Download PNG** saves the picture to your Downloads.
- **Copy** puts it on your clipboard, to paste straight into a document, a slide or a chat.
- Under the code, "Ready — points to ..." shows where the code will take people.

On the free plan the download is 600 px, with a small qr.stroban.app watermark in the corner. The bigger sizes and the buttons marked **Pro** come with Pro.

Something wrong with a code? Tap

Something wrong with this code? Tell us under the buttons.

4 The Pro extras Pro

- **Logo in the centre:** Add logo drops your logo in the middle. Error correction goes up to Max so the code still scans.
- **Design: Modules** as Squares, Rounded or Dots; a Gradient fill; a Transparent background.
- **Frame & caption:** Bar or Box, with a ready caption such as "Scan to pay" or your own words.
- **Bigger and print-ready:** PNG at 1000 or 2000 px, Download SVG for a printer, and Download PDF.

Logo in the centre

☒ Add logo

Drops your logo in the middle. Error correction is raised to Max so the code still scans.

Design

Modules: Squares **Rounded** Dots

Fill: **Solid** Gradient

Background: **Solid** Transparent

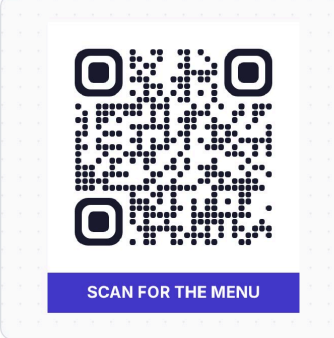

Frame & caption

None **Bar** Box

Caption: Scan to pay ▼

Download size: 600 1000 2000

[Download PNG](#) [Copy](#)

[Download SVG](#)

[Batch generate](#)

[Download PDF](#)

Batch generate makes many codes at once, for example one per table or one per product: paste one link per line, choose **PNG** or **SVG**, and tap **Generate ZIP**. Every code uses your current colours, logo, size and error correction.

Batch generate ✕

Paste one link per line. Each becomes a QR code, bundled into a single ZIP. Uses your current colours, logo, size, and error-correction.

5 Activate Pro Pro

Tap **Get Pro**, then **Buy Pro · ₹199 on WhatsApp**. Outside India, the button shows \$12 and we send a payment link on WhatsApp (travelling? **Outside India? See the \$12 price** in ⚙ Settings switches the price). Your key arrives by email from **hello@stroban.app** (check spam the first time). It looks like `QR5-XXXX-XXXX-XXXX-XXXX`.

1. Tap **Get Pro** at the top, or  and then **Already bought? Enter key.**
2. Paste the key in the box under "already bought?" and tap **Unlock.**
3. "Unlocked. Enjoy Pro!" appears, the watermark goes, and the Pro buttons work.

Pro stays on that browser. To use it on another phone or computer, paste the same key there.

 Settings once Pro is on.

✓ Good to know and help

- **Private by default.** Codes are made in your browser. Only these ever reach Stroban: your email and name if you choose to sign in, your licence key when you activate it, and a feedback message if you send one.
- **Signing in is optional.**  **Settings** → **Account** keeps a contact with us. Your codes never need an account.
- **Install it.**  **Settings** → **Install QR Studio** adds it to your home screen or desktop, and it works offline. On an iPhone: Share, then Add to Home Screen.
- **A shared or office computer?** Use  **Settings** → **Deactivate on this device** before you leave it. Your key keeps working.
